WHAT IS A CHILDREN’S MUSEUM?
With a focus on early childhood learning through play and discovery, children’s museums offer exciting educational experiences for children and their families! These experiences serve to prepare children for school, build 21st century skills, and encourage a lifelong joy of learning.

WHAT CAN I EXPECT WHEN I VISIT?
At the Mississippi Children’s Museum—Meridian, we take fun seriously! Children can tinker and create in our WonderBox laboratory, climb into a giant brain to learn about its many functions, navigate an airplane's cockpit, and much more. MCM-Meridian wants children to achieve their potential through fun and engaging activities that promote learning. Our museum has 9,500 square feet of indoor experiences and 25,000 square feet of outdoor experiences designed around our educational initiatives: STEAM, literacy, health and nutrition, and Mississippi heritage.
